(details on back)
STEM-ED 101

Step 1: Inquiry Approaches to Teaching

Design and deliver engaging lessons during visits to elementary classrooms.

1 credit

- All Majors Welcome -

• Observe a teacher and their students in a local elementary school
• Design 2 short inquiry-based lessons and teach them to upper elementary students with a partner
• Discuss and reflect upon the best way for students to learn science, technology, engineering, and mathematics topics

Great Experience, Valuable Skills

Why Take this Class?
• Jobs and graduate schools value applicants with teaching experience.
• Many careers involve teaching/mentoring new employees.
• Communities benefit when citizens know about STEM education.
